

Prahlad Singh

Full-Stack Developer — MERN / MEVN — React Native — Real-Time & Multi-Tenant Systems

📍 Gurgaon, Haryana, IN — ✉ prahlad.singh.dev@gmail.com — 📞 +91 91490 62842
🌐 linkedin.com/in/prahlad-singh — 🐙 github.com/PrahladWebDev — 🌐 prahladsingh.in

Summary

Full-stack developer specializing in MERN/MEVN, with production experience building multi-tenant SaaS architectures, JWT/RBAC authentication, and real-time systems (Socket.io, PeerJS, Redis). Comfortable end-to-end: MongoDB schema design, RESTful APIs, pixel-perfect React/Vue/React Native frontends, and Linux DevOps (Nginx, PM2, GitHub Actions). Currently building a large-scale healthcare platform with DICOM imaging, telemedicine, and Razorpay payments.

Technical Skills

Frontend	React.js, Vue.js, React Native (Expo), Redux Toolkit, Vuex, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3, Vite
Backend	Node.js, Express.js, RESTful APIs, Socket.io, PeerJS (WebRTC), Redis, JWT, RBAC, PHP
Database	MongoDB, Mongoose, Aggregation Pipelines, Multi-Tenant Architecture, MySQL, Schema Design & Indexing
DevOps & Tools	Linux, Nginx, PM2, GitHub Actions (CI/CD), Git, SSH/SCP, SSL, Postman, Puppeteer, Cloudinary
Payments, Media & APIs	Razorpay, DICOM Imaging (DWV), Video Streaming, react-native-svg, OpenWeatherMap API, remove.bg, Cron Automation

Experience

Lifelayer Health Solutions Pvt. Ltd.
Backend Developer → Full-Stack Developer

Gurugram, India
Dec 2024 – Present

- Built a large-scale multi-tenant healthcare platform (MEVN) with per-company MongoDB isolation, a connection manager, and a model factory pattern.
- Built a production-grade telemedicine system using PeerJS, Socket.io, and Redis session persistence with ICE restart and multi-device login support.
- Implemented real-time ambulance booking with live GPS tracking via Socket.io and Google Maps, and integrated Razorpay payments with Puppeteer-generated PDF invoicing.
- Designed JWT/RBAC authentication across 5+ roles, backed by indexed, HIPAA-aligned MongoDB schemas.

Projects

Wardrobe Manager — Mobile Wardrobe & Outfit Planning App

APK — GitHub

- Built a full-stack React Native (Expo) app with a Node/Express/MongoDB backend: wardrobe grid with search/filters/pagination, a reusable outfit builder, and a laundry tracker that auto-excludes dirty items from suggestions.
- Built a "Today" tab with weather-aware outfit suggestions (OpenWeatherMap + location) and a trip packing-list generator pulling weather-appropriate items from the user's own closet.
- Built a Stats tab using MongoDB aggregation pipelines (wear timelines, cost-per-wear, closet value) with react-native-svg charts, plus remove.bg photo cleanup and an in-app, on-device Server Settings screen.

ShareVault — Secure File & Video Sharing Platform

Live — GitHub

- Built a full MERN file-sharing platform with password-protected, expiring share links, OTP verification, and download limits.
- Designed an admin-only Video Vault with authenticated streaming via HTTP Range headers, plus JWT access/refresh auth with httpOnly cookies and RBAC.
- Built an automated cleanup engine (node-cron) enforcing 24-hour file TTLs with storage usage tracking and logs.

MythLok — World Folklore & Mythology Platform

Live — GitHub

- Built a community storytelling platform with 500+ folklore stories across 20+ countries and an interactive country-tile world map.
- Designed a full contributor workflow (multi-step submission, draft saving, admin review) plus bookmarks, ratings, comments, and a 10-badge achievement system.
- Led a large-scale architecture migration from a state-wise to a country-wise data model across the entire application.

School ERP — Multi-Tenant School Management System

Live — GitHub

- Architected a multi-tenant ERP using shared-database, tenant-scoped Mongoose models for secure per-school data isolation.
- Built academics, attendance, fees/accounting, timetable, exam, and homework modules with role-based dashboards for admins, teachers, students, and parents.
- Added real-time notifications and a notice board via Socket.io, plus a Redux-driven React frontend.

Education

Master of Computer Applications (MCA)
Dr. A.P.J. Abdul Kalam Technical University
Bachelor of Computer Applications (BCA)
Mahatma Jyotiba Phule Rohilkhand University
