

Prahlad Singh

Full-Stack Developer — MERN / MEVN — Real-Time & Multi-Tenant Systems

📍 Gurgaon, Haryana, IN — ✉ prahlad.singh.dev@gmail.com — 📞 +91 91490 62842

🌐 linkedin.com/in/prahlad-singh — 🐙 github.com/PrahladWebDev — 🌐 Portfolio

Summary

Full-stack developer specializing in the MERN/MEVN stack, with production experience building multi-tenant SaaS architectures, JWT/RBAC authentication, and real-time systems (Socket.io, PeerJS, Redis). Comfortable end-to-end: MongoDB schema design, RESTful API development, and pixel-perfect React/Vue frontends, backed by hands-on Linux DevOps (Nginx, PM2, GitHub Actions CI/CD). Currently building a large-scale healthcare platform with DICOM medical imaging, telemedicine, and Razorpay payments.

Technical Skills

Frontend React.js, Vue.js, Redux Toolkit, Vuex, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3, Vite
Backend Node.js, Express.js, RESTful APIs, Socket.io, PeerJS (WebRTC), Redis, JWT, RBAC, PHP
Database MongoDB, Mongoose, Multi-Tenant Architecture, MySQL, Schema Design & Indexing
DevOps & Tools Linux, Nginx, PM2, GitHub Actions (CI/CD), Git, SSH/SCP, SSL, Postman, Puppeteer, Cloudinary
Payments & Media Razorpay Integration, DICOM Medical Imaging (DWV), Video Streaming, Cron Automation

Experience

Lifelay Health Solutions Pvt. Ltd.
Backend Developer → Full-Stack Developer

Gurugram, India
Dec 2024 – Present

- Built a large-scale multi-tenant healthcare platform (MEVN) with per-company MongoDB isolation, a connection manager, and a model factory pattern.
- Built a production-grade telemedicine video system using PeerJS, Socket.io, and Redis session persistence with ICE restart and multi-device login support.
- Implemented real-time ambulance booking and live GPS tracking via Socket.io and Google Maps integration.
- Integrated the Razorpay payment gateway with a full transaction schema and Puppeteer-generated PDF invoicing.
- Designed JWT authentication with RBAC across 5+ roles, backed by indexed, HIPAA-aligned MongoDB schemas.
- Managed VPS deployments end-to-end: Linux, Nginx reverse proxy, PM2 process management, and CI/CD via GitHub Actions.

Projects

ShareVault — Secure File & Video Sharing Platform

Live — GitHub

- Built a full MERN file-sharing platform with password-protected, expiring share links, OTP verification, and download limits.
- Designed an admin-only Video Vault with authenticated streaming via HTTP Range headers, separate from regular file storage.
- Implemented JWT access/refresh token auth with httpOnly cookies, bcrypt hashing, and role-based access control.
- Built an automated cleanup engine (node-cron) enforcing 24-hour file TTLs with storage usage tracking and logs.

MythLok — World Folklore & Mythology Platform

Live — GitHub

- Built a community storytelling platform with 500+ folklore stories across 20+ countries and an interactive country-tile world map.
- Designed a full contributor workflow: multi-step submission, draft saving, and admin approve/reject/request-changes review.
- Shipped bookmarks, star ratings, comments, reading history, and a 10-badge achievement system to drive engagement.
- Led a large-scale architecture migration from a state-wise to a country-wise data model across the entire application.

School ERP — Multi-Tenant School Management System

Live — GitHub

- Architected a multi-tenant ERP using shared-database, tenant-scoped Mongoose models for secure per-school data isolation.
- Built academics, attendance, fees/accounting, timetable, exam, and homework modules with role-based dashboards for admins, teachers, students, and parents.
- Added real-time notifications and a notice board via Socket.io, plus a Redux-driven React frontend.

Education

Master of Computer Applications (MCA)
Dr. A.P.J. Abdul Kalam Technical University

2022 – 2024

Bachelor of Computer Applications (BCA)
Mahatma Jyotiba Phule Rohilkhand University

2019 – 2022

Languages: English, Hindi — **Availability:** Open to full-time opportunities
