Prahlad Singh

Full-Stack Developer | MERN / MEVN | React Native | Real-Time & Multi-Tenant Systems

Gurgaon, Haryana, IN | prahlad.singh.dev@gmail.com | +91 91490 62842

linkedin.com/in/prahlad-singh | github.com/PrahladWebDev | prahladsingh.in

Summary

Full-stack developer specializing in MERN/MEVN with production experience in multi-tenant SaaS, JWT/RBAC security, and real-time systems (Socket.io, PeerJS, Redis), plus Java/Spring Boot. Comfortable end-to-end: MongoDB/MySQL schema design, REST APIs, React/Vue/React Native frontends, and Linux DevOps (Nginx, PM2, GitHub Actions). Experienced in healthcare technology, including DICOM imaging, telemedicine, and Razorpay payments. Shipped 14 projects, including a Microsoft Store app and an npm CLI.

Technical Skills

Frontend	React.js, Vue.js, Vuetify, React Native (Expo), Next.js, Redux Toolkit, Vuex, TanStack Query, JavaScript (ES6+)/TypeScript, Tailwind CSS, HTML5/CSS3, Vite, Monaco Editor
Backend	Node.js, Express.js, NestJS, Java, Spring Boot, Spring Security, Spring Data JPA, RESTful APIs, Socket.io, PeerJS (WebRTC), Redis, JWT, RBAC, PHP
Database	MongoDB, Mongoose, Aggregation Pipelines, Multi-Tenant Architecture, MySQL, Schema Design & Indexing
DevOps & Tools	Linux, Nginx, PM2, Docker, GitHub Actions (CI/CD), Git, SSH/SCP, SSL, Postman, Puppeteer, Cloudinary, Vitest, Electron
Publishing	Microsoft Store, Play Store, Android APK Distribution, npm Publishing, CLI Development (Ink)
Data Viz, AI & APIs	Chart.js, Three.js, D3.js, Gemini API, GitHub API, Razorpay, DICOM Imaging (DWV), OpenWeatherMap API, remove.bg, Cron Automation

Experience

Mydocin IT Solution Pvt. Ltd. — Faridabad, Haryana, India
Full-Stack Developer — *5 May 2026 – Present*

- Developing healthcare technology products and scalable web applications for clinical and operational workflows, contributing across frontend, backend, REST APIs, database integration, and business logic.
- Working with JavaScript technologies and multi-tenant architecture, while supporting platform enhancements, third-party integrations, workflow automation, and production deployments.

Lifelayer Health Solutions Pvt. Ltd. — Gurugram, India
Backend Developer — *17 Mar 2025 – 4 May 2026*

- Contributed to a multi-tenant MEVN healthcare platform with company-level MongoDB data isolation, scalable backend services, REST APIs, and data models.
- Worked on healthcare integrations including DICOM medical imaging, real-time communication, location-based services, and payments; implemented JWT/RBAC security and supported Linux, Nginx, PM2, and GitHub Actions deployments.

Projects

GathaLok — World Folklore Platform (Web, Android & Windows) — Live | Microsoft Store | Play Store | GitHub

- Built a storytelling platform with 500+ stories across 20+ countries, a contributor workflow (drafts, admin review), an admin CMS, and JWT auth with 4 roles; published the desktop edition on the Microsoft Store.
- Led a large-scale architecture migration from a state-wise to a country-wise data model across the entire application.

Foldd — Wardrobe & Outfit Planning App (React Native) — Play Store | GitHub

- Built a full-stack Expo app with a Node/Express/MongoDB backend: outfit builder, laundry tracker, weather-aware suggestions (OpenWeatherMap), and a trip packing-list generator.
- Built a Stats tab on MongoDB aggregation pipelines (wear timelines, cost-per-wear) with react-native-svg charts, plus remove.bg photo cleanup.

Assessment Platform — Proctored Online Exams — Live | GitHub

- Built three coordinated apps (Vue 3 + Vuetify admin, proctored candidate app with Monaco editor, Node/Express/MongoDB backend) with autosave, auto-submit timers, and webcam/screen recording.
- Added copy-paste/devtools violation detection, bulk CSV/XLSX import, and a live progress dashboard over Socket.IO with optional Redis cache.

Expense Tracker — Spring Boot & React (TypeScript) — Live | GitHub

- Built a Java 21 / Spring Boot 3 / MySQL backend with JWT refresh-token rotation, RBAC, and a Splitwise-style group system with a debt-simplification engine; added receipt OCR and PDF/CSV reports.
- Wrote Mockito and Vitest unit tests; fully Dockerized with docker-compose for one-command startup.

Codebase Detective — Deterministic Codebase Analysis — Live | GitHub

- Built a tool (ZIP or GitHub URL) producing architecture reports via Babel AST import resolution, a React Flow dependency graph, DFS circular-dependency detection, and git churn analysis; hardened against zip-slip/path traversal.

Education

Master of Computer Applications (MCA) — **Dr. A.P.J. Abdul Kalam Technical University** — 2022 – 2024

Bachelor of Computer Applications (BCA) — **Mahatma Jyotiba Phule Rohilkhand University** — 2019 – 2022

Languages: English, Hindi | **Availability:** Open to full-time opportunities
